File Handling in C++

File “A file is a logical collection of records where each record consists of a number of items known as fields”. The records in a file can be arranged in the following three ways: • Ascending/Descending order: The records in the file can be arranged according to ascending or descending order of a key field..

What is File? - Chaudhary Charan Singh University

File is a collection of records related to each other. The file size is limited by the size of memory and storage medium. There are two important features of file: 1. File Activity 2. File Volatility File activity specifies percent of actual records which proceed in a single run. File volatility addresses the properties of record changes. It helps to increase the efficiency of disk design
