the filesystem). An inode contains all information about a file, except its name. The name is stored in the directory, together with the number of the inode. A directory entry consists of a filename and the number of the inode which represents the file. The inode contains the numbers of several data blocks, which are used to store the data in the file.

What is File? - Chaudhary Charan Singh University

File is a collection of records related to each other. The file size is limited by the size of memory and storage medium. There are two important features of file: 1. File Activity 2. File Volatility

specifies percent of actual records which proceed in a single run. File volatility addresses the properties of record changes. It helps to increase the efficiency of disk design

File Naming Conventions: simple rules save time and effort

- 1. Keep file names short, meaningful and easily understandable to others. 2. Order the elements in a file name in the most appropriate way to retrieve the record. 3. Avoid unnecessary repetition and redundancy in file names and paths 4. Avoid obscure abbreviations and acronyms. Use agreed University abbreviations and codes where relevant. 5.
