What is File? - Chaudhary Charan Singh University

File is a collection of records related to each other. The file size is limited by the size of memory and storage medium. There are two important features of file: 1. File Activity 2. File Volatility File activity specifies percent of actual records which proceed in a single run. File volatility addresses the properties of record changes. It helps to increase the efficiency of disk design

BAI Format - Overview - TD Commercial Banking

file

This record contains information on the file control total, the number of groups and the number of records. The file control total is the sum of the group control totals in the file. The number of groups is the sum of type 02 records in the file. The number of records is the sum of all records in the file, including the file trailer (type 99) record.
