Webthe filesystem). An inode contains all information about a file, except its name. The name is stored in the directory, together with the number of the inode. A directory entry consists of a filename and the number of the inode which represents the file. The inode contains the numbers of several data blocks, which are used to store the data in the file.

Understanding File Attributes - 2BrightSparks

Weboperating system and software applications to define file system behavior. How are File Attributes Used? File attributes are pieces of information associated with every file and directory that includes additional data about the file itself or its contents. They can exist in only one of two states - Set or Cleared; similar to an On or Off state.
